A Bunker Adjustment Factor (BAF) applies to all towage services. The BAF is based on the monthly average per barrel price of Gasoil in Singapore (Gasoil 10ppm Singapore FOB Cargoes) published by Bloomberg and the monthly average rate of exchange between USD and AUD as published by the Reserve Bank of Australia. The BAF to apply will be decided by the average bunker price and rate of exchange during the month which is two months previous. For example, to generate the applicable BAF for the month of April the average Gasoil price and USD>AUD rate for February will be used on the matrix. Notwithstanding this, the BAF may be additionally adjusted for, with or without notice, in response to changes to the Australian fuel tax credit scheme, extraordinary fluctuations in the oil prices and/or rates of exchange.
